

Meme Lordz

The First Decentralized Meme Market

The average internet user spends over 3 years/day looking at memes.

Most users don't get paid for inventing the future of communication.

Meme Lordz is a platform for geniuses to monetize their meme-skills

Skilled memer w/ **empty** bank account

Skilled memer crushes it on the
Meme Stock Market

Skilled memer w/ **filled** bank account

How it Works

Meme Lordz
The first decentralized meme market!

Turn any meme into a tradable cryptocurrency. Let the market define its value based on popularity. Buy and sell meme currency on our platform, and start earning. The more meme-predicting skills you have, the more you'll earn!

Built on Ethereum and IPFS.

This is an MVP, follow us on [Telegram](#) for updates.

Team

Slava Balasnov

Slava is a full-stack developer with a background in Mathematics and Computer Science. He is the founder of Relevant — a company developing decentralized reputation and content-curation protocols. Previously Slava co-founded 4Real, a digital agency and art collective whose clients include Google, Comcast and Clinton Foundation. Slava was born in Moscow and currently lives in New York.

Sarah Friend

Sarah Friend ([@isthisanart](https://twitter.com/isthisanart)) is an artist and software engineer working at a large blockchain development studio. When not doing that, she creates games and other interactive experiences. She is a proud Recurse Center alum, and has presented at Transmediale in Berlin, Ethereal Summit in NYC, and NorthSec in Montreal. She was recently chosen as one of Canada's 30 under 30 developers, is one of the organizers of Our Networks, a conference on all aspects of the distributed web in Toronto.

Billy Rennekamp

Billy Rennekamp is an artist and developer working for Cosmos/Tendermint. He recently received a grant from the Ethereum Community Fund to continue work on his project Clovers.Network, an educational game that rewards the creation of scarce art. He'll be starting a residency at Pioneer Works in New York during the autumn of 2018.

Jules LaPlace

Jules LaPlace is a full-stack developer currently exploring creative uses of machine learning. Previously he was CTO of OKFocus, an award-winning digital agency in New York City, where he led development of new concepts in digital advertising, music and the arts for clients such as Google, Viacom, and the Met, as well as developing several successful viral websites. He is based in Berlin.

Tom Galle

Tom Galle ([@tomgalle](https://twitter.com/tomgalle)) is a concept driven Artist working in the realm of surreal, internet culture-inspired scenes. His fast-paced conceptual art often results in viral content embraced by meme cycles, while becoming the catalyst for discussions on subjects of digital zeitgeist. Tom currently works as a freelance Digital Creative for clients such as Google, MTV, Nike, and more and has won numerous creative awards including a Cannes Lions Grand Prix, One Show, D&AD, Webby.
